ENERGY MANAGER™
AUTO  **START**

For **TRID!UM**® JACE®

Introducing Energy Manager AutoStart™ for Tridium JACE®

Now That's Smart Energy Management

Do you want to take control of your energy consumption and costs?
Are you looking for an easy way to optimize your current energy metering investment?
We understand. That's why we created *Energy Manager AutoStart™*!

Energy Manager AutoStart™ is a superior, web based, plug and play solution for monitoring and controlling energy consumption. *AutoStart* combines the power of EFT's *Energy Manager™* software, the robust data collection of Tridium JACE® controllers and the efficiency of *Energy Manager AutoStart™* hosted data center to give you a solution that is feature rich and hassle free. It is designed to get you started quickly, easily and efficiently. Simply connect *AutoStart* to your JACE® controller and you can begin immediately to monitor and control your energy use and expense in real-time. *Energy Manager AutoStart™* will grow with your enterprise and you can easily add meters, buildings and users.

Energy Manager AutoStart™ Is Powerful Energy Management

Energy Manager AutoStart™ is a comprehensive, web based software platform that provides a wealth of real-time energy data, analytics, drilldown and reporting. It gives managers the information they need to make intelligent energy decisions. *Energy Manager AutoStart™* monitors usage across all utilities (electric, water, gas, steam, etc.) and from all buildings in a portfolio. It is a mature, fifth generation software product that has been proven and refined for over twelve years. It is so easy to use. All reports are no more than 3 clicks away!

Energy Manager AutoStart™ is the perfect complement to your Tridium JACE® system. Every *AutoStart* package includes a subscription to *Energy Manager AutoStart™* hosted service that allows you to easily access your real-time data online from any web enabled computer. Simply put, *Energy Manager AutoStart™* collects, stores and reports the data for you, freeing you to focus on actively managing your portfolio's energy consumption.

Getting Started Is Easy!

Simple Requirements

- ✓ *Energy Manager AutoStart™*
- ✓ Tridium JACE® controller with OBIX driver and a public IP connection
- ✓ Electric, gas, water, steam, etc. utility meters and/or submeter(s)
