ENERGY MANAGER™  
**AUTO**  **START**

NEAT, COMPLETE

READY TO GO

## Introducing *Energy Manager AutoStart™* Now *That's* Smart Energy Management

Do you want to take control of your energy consumption and costs, but don't know where to start?  
Are concerns about cost, requirements, or set-up holding you back?  
We understand. That's why we created *Energy Manager AutoStart™*!

*Energy Manager AutoStart™* is a web based all-in-one kit for monitoring and controlling energy consumption. It is designed to minimise your investment and get you started quickly, easily and efficiently. *Energy Manager AutoStart™* is feature-rich and hassle-free. Simply add meters and you can begin immediately to monitor and control your energy use and expense in real-time. *Energy Manager AutoStart™* will grow with your enterprise and you can add meters, buildings and users at any time.

### *Energy Manager AutoStart™ Is Powerful Energy Management*

*Energy Manager AutoStart™* is a comprehensive, web based software platform that provides a wealth of real-time energy data, analytics, drilldown and reporting. It gives managers the information they need to make intelligent energy decisions. *Energy Manager AutoStart™* monitors usage across all utilities (electric, water, gas, steam, etc.) and from all buildings in a portfolio. It is a mature, fifth generation software product that has been proven and refined for over twelve years. It is so easy to use. All reports are no more than 3 clicks away!

*Energy Manager AutoStart™* kit comes with a DATATrak™ data collection gateway and a twelve month subscription to *Energy Manager AutoStart™* hosted service that allows you to easily access your real-time data on line from any web enabled computer. Simply put, *Energy Manager AutoStart™* collects, stores and reports the data for you, freeing you to focus on actively managing your portfolio's energy consumption.

### *Getting Started Is Easy!*

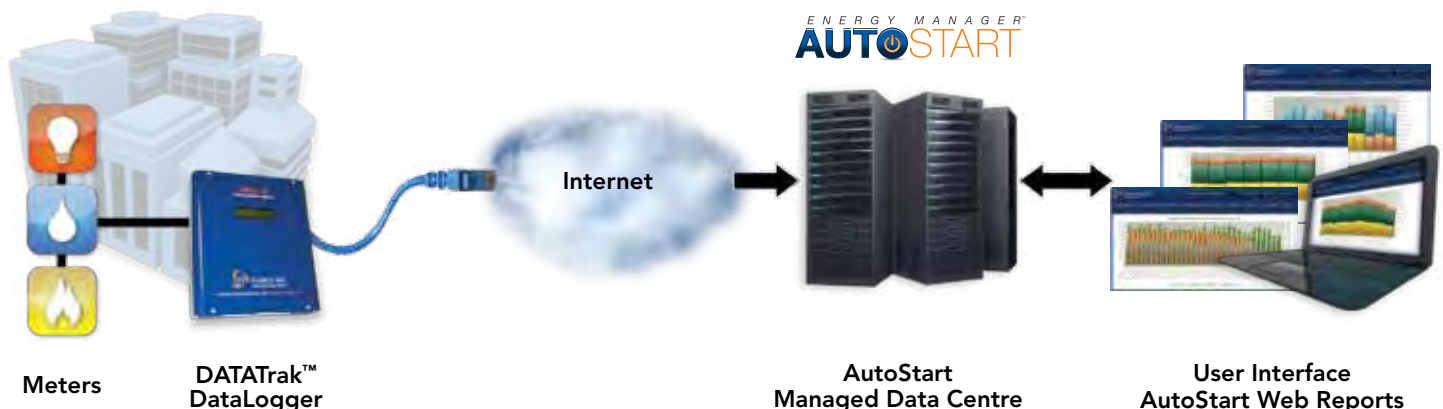

Simple Requirements

- ✓ *Energy Manager AutoStart™* kit
- ✓ An Ethernet connection
- ✓ Meter(s) with pulse output

Simple Installation

- ✓ Install DATATrak™ device\*
  - ✓ Connect Ethernet and meter(s) to DATATrak™\*
- \*Contact your electrician or qualified technician
